Headquarters

CAPITAL

.it

Con i suoi 15.000 mq di superficie totale e dodici metri di altezza, l'edificio diventa uno spazio che rispetta e tutela principi di work-life balance e riduzione dell'impatto ambientale. Il progetto firmato Christian Grande DesignWork in collaborazione con lo Studio Orteschi tiene conto dei più recenti principi di sostenibilità energetica, ambientale ed economica. Un vero e proprio edificio green pensato per garantire livelli ottimali di comfort, riducendo i consumi. "Ogni progetto, ogni realizzazione, si pone come un sistema organico di spazio, sostanza e sensazione: un abito su misura."

La nuova sede rappresenta un'importante sfida per l'azienda nel perseguire un continuo aggiornarsi, dotarsi di nuovi ambienti e rilanciando la società verso sfide internazionali che la vedono protagonista. Uno spazio più ampio ed efficiente, principalmente più allineato ai valori aziendali, capace di consolidare lo spirito di coesione tra i collaboratori e il radicamento dell'azienda sul territorio.

With its 15.000 square meters of total surface and 12 mt of height, the building becomes a space that respects and protects the principles of work-life balance and reduction of environmental impact. The project signed by Christian Grande Designwork in collaboration with Studio Orteschi takes into account the latest principles of energy, environmental and economic sustainability. A real green building designed to guarantee optimal levels of comfort, reducing consumption. "Every project, every realization, is possible as an organic system of space, substance and feeling: a tailored suit."

The new headquarters represents an important challenge for the company in pursuing continuous upgrade, providing new environments and relaunching the company towards international challenges as protagonist. A wider and more efficient space, mainly aligned to company values, able to consolidate the spirit of cohesion between collaborators and company strong local rooting.

Tutti gli ambienti di lavoro possono relazionarsi con la presenza di una vegetazione appositamente studiata come elemento che "ossigena" gli spazi e contribuisce a mitigare ogni componente alienante, in un'ideale continuità tra ambiente interno ed esterno.

L'edificio è certificato in classe energetica A3 e utilizza macchine frigorifere in pompa di calore per il riscaldamento degli ambienti interni grazie ai 350 pannelli solari.

La prestazione energetica è ulteriormente migliorata da un sistema molto efficiente di ventilazione meccanica degli spazi interni, dotato di sistemi di recupero del calore. Molti saranno gli angoli verdi presenti all'interno ed all'esterno della sede, spazi verdi che richiedono bassi consumi idrici, mantenuti da un sistema di irrigazione che sfrutta sensori di pioggia e monitora il grado di umidità del suolo.

L'edificio ospita inoltre una caffetteria e un rooftop panoramico aperti ai dipendenti e ai clienti, destinati ad attività multifunzionali.

All working environments can relate to the presence of vegetation especially designed as an element that "oxygenates" spaces and contributes to cancel every aliening component, in an ideal continuity between internal and external environment.

The building is certified in energy class A3 and uses only refrigerating machines with heat pump for heating the internal environments, thanks to the 350 solar panels; the connection to methane gas network is not present.

Energy performance is further improved by a very efficient mechanical ventilation system in internal spaces, equipped with heat recovery systems. There will be many green corners, inside and outside the building, spaces that require low water consumption, with an irrigation system that uses rain sensors and controls the degree of humidity of the ground.

In the building there is also a cafeteria and a panoramic rooftop for employees and customers, intended for multifunctional activities.

The modular layout makes it suitable for any space. The vertical wooden elements contrast with the spacious glass shelves, merging seamlessly thanks to the metal finish joints, which add elegance and lightness to the bookcase.

Il concetto di Bolivar è nato pensando all'idea di leggerezza fisica e visiva; la base in essenza crea armonia con il piano d'appoggio: questo connubio permette di simulare un volume sospeso che conferisce un tocco etereo e volubile allo spazio circostante.

Olimpia potrebbe confondersi con una scultura della Grecia ellenistica.

Le forme richiamano quelle di un tempio antico; le gambe si ispirano a colonne doriche, mentre le finiture la riportano al presente e le donano un aspetto più contemporaneo.

Olimpia Writing Desk might be considered as a Hellenic Greek sculpture.

The forms recall those of an ancient temple. In fact, the legs are inspired by Doric columns, while the finishing return it to the present and give it a more contemporary design.
